## Pilot Research Program 2022 Call for Applications *Release: October 4, 2021*

### SUBMISSION AND REVIEW DATES

<b>Call for Applications Release</b>	October 4, 2021
<b>Webinar for Applicants</b>	October 12, 2021, 10am ET
<b>Deadline for Questions</b>	November 1, 2021
<b>Response to Questions Available</b>	November 15, 2021
<b>Deadline to contact Research Center for collaboration</b>	November 24, 2021
<b>Deadline for Letter of Intent (LOI)</b>	December 13, 2021
<b>Deadline for Full Application</b>	January 31, 2022
<b>Notification of Award</b>	March 21, 2022

### **Call for Applications 2022: Synopsis**

The CREID Network Pilot Research Program supports, trains, and mentors the next generation of emerging infectious disease researchers. This program will help develop capacity for emerging infectious disease research around the world.

Scientific research project topics could include but are not limited to studies on pathogen transmission, emergence, or maintenance in an ecosystem; pathogenesis; characterization of viral antigens; phylogenetics; viral diversity; sociological or behavioral influences on emerging or reemerging viral diseases; development of reagents and diagnostic assays to improve detection of emerging pathogens; and studies aimed at detailing human immune responses to new or emerging infectious agents. Preliminary data are not required.

## 1. Pilot Research Program Overview

### 1.1 Background

The Centers for Research in Emerging Infectious Diseases Network (CREID Network) is made up of 10 Research Centers (RCs) and a Coordinating Center (CC) operating in regions around the globe where emerging and reemerging infectious disease outbreaks are likely to occur. Multidisciplinary teams of investigators will conduct pathogen/host surveillance; study pathogen transmission, pathogenesis, and immunologic responses in the host; and develop reagents and diagnostic assays for improved detection of important emerging pathogens and their vectors. For more information about the CREID Network, please visit its website (<https://creid-network.org/>). For more information on the pathogens and diseases being studied as part of the CREID Network, please visit the pathogens page on the website (<https://creid-network.org/pathogens>).

#### **CREID Research Centers**

- American and Asian Centers for Arboviral Research and Enhanced Surveillance (A2CARES)
- Center for Research in Emerging Infectious Disease-Epidemiology, surveillance, pathogenesis (CREID-ESP)
- Center for Research in Emerging Infectious Diseases-East and Central Africa (CREID-ECA)
- Coordinating Research on Emerging Arboviral Threats Encompassing the Neotropics (CREATE-NEO)
- Emerging Infectious Diseases: South East Asia Research Collaboration Hub (EID-SEARCH)
- EpiCenter for Emerging Infectious Disease Intelligence (EEIDI)
- Pasteur International Center for Research on Emerging Infectious Diseases (PICREID)
- United World Antivirus Research Network (UWARN)
- West African Center for Emerging Infectious Diseases (WAC-EID)
- West African Research Network for Infectious Diseases (WARN-ID)

#### **CREID Coordinating Center**

The CREID Coordinating Center (CREID CC) is a partnership between RTI International and Duke University's Human Vaccine Institute. Serving as the operational hub for the CREID Network, the CREID CC team offers expertise in supporting administration and management of data and scientific programs. The CREID CC administers the Pilot Research Program.

### 1.2 Objectives and Research Priorities

The CREID Network Pilot Research Program supports, trains, and mentors the next generation of emerging infectious disease researchers. This program will help develop capacity for emerging infectious disease research around the world through the performance of scientific research projects.

Scientific research project topics could include but are not limited to studies on pathogen transmission, emergence, or maintenance in an ecosystem; pathogenesis; characterization of viral antigens; phylogenetics; viral diversity; sociological or behavioral influences on emerging or reemerging viral diseases; development of reagents and diagnostic assays to improve detection of emerging pathogens; and studies aimed at detailing human immune responses to new or emerging infectious agents. Preliminary data are not required.

Additional examples of types of research this program would consider include the following:

- Retrospective epidemiological study using already captured clinical data (secondary human subjects research) or other experimental data.
- Behavioral/social science studies on unique aspects of a particular clinical cohort, but not a clinical trial, and that are nested within a parent study.
- Characterizing pathogens or pathogen diversity from previously collected animal or vector specimens.
- Lab-based study answering a finite and well-defined hypothesis.

#### Human Subjects Research:

- This program is not designed to support submission of new human subjects research, given the length of time required to receive Institutional Review Board (IRB) approval for new studies. Nor does this program support clinical trials. However, human subjects research is allowed within a limited scope, including research applications nested within a parent study with an IRB approval in place and requiring only a modification for the additional sub-study. In addition, clinical research applications nested within a parent clinical trial are allowed if the research application itself is not a clinical trial and no funds will go toward a clinical trial. Research involving stored specimens from human subjects is allowed provided the specimens are deidentified and cannot be linked back to the subjects.
- **As part of the Letter of Intent**, applicants must notify the CREID CC of their plan to conduct a human subjects research study and describe the parent study and the plan for receiving an IRB modification within 2 months of the award (LOI instructions on page 9).
- **As part of the Application**, see detailed instructions on page 12.
- For more information on human subjects research, please visit the National Institutes of Health (NIH) website: <https://grants.nih.gov/policy/humansubjects.htm>.

#### Animal Studies

- This program is not designed to support submission of new animal research studies, given the length of time required to receive Institutional Animal Care and Use Committee (IACUC) approval for new studies. However, animal studies are allowed within a limited scope, including research applications nested within a parent study with an IACUC approval in place and requiring only a modification for the additional sub-study.
- **As part of the Letter of Intent**, applicants must notify the CREID CC of their plan to conduct an animal study and describe the parent study and the plan for receiving an IACUC modification within 2 months of the award (LOI instructions on page 9).
- **As part of the Application**, see detailed instructions on page 12.
- For more information: <https://olaw.nih.gov/guidance/vertebrate-animal-section.htm>

#### Select agent studies

- Applicants may propose studies that involve pathogens that are considered select agents based on the Federal Select Agent Program definitions (<https://www.selectagents.gov/sat/list.htm>) if they can demonstrate the facility, organization, or institution where the select agent work is to be conducted has received prior approval from the National Institute of Allergy and Infectious Diseases (NIAID) for the specific select agent to be utilized.
- **As part of the Letter of Intent**, applicants must notify the CREID CC of their intent for utilizing select agents (LOI instructions on page 9).

This program will not fund:

- Human subjects research requiring a new IRB approval (rather than a modification of an existing IRB approval).
- Clinical trials: Please see this website for more information on the definition of clinical trials (<https://grants.nih.gov/policy/clinical-trials/definition.htm>).
- Animal study requiring a new IACUC approval (rather than modification of an existing IACUC approval).
- Other areas outside of funding priorities include specific HIV/AIDS-only and other topics not within scope of the CREID Network (e.g., brain disorders, addiction).
- Research that falls within the categories of *United States Government Policy for Institutional Oversight of Life Sciences Dual Use Research of Concern* (<https://www.phe.gov/s3/dualuse/Pages/InstitutionalOversight.aspx>) or within the *United States Department of Health and Human Services Framework for Guiding Funding Decisions about Proposed Research Involving Enhanced Potential Pandemic Pathogens* (HHS P3CO Framework) (<https://www.phe.gov/s3/dualuse/Pages/p3co.aspx>).

### 1.3 Eligibility

The CREID Pilot Research Program is designed for researchers who are in the early stage of their careers, including applicants from lower- and middle-income countries (LMICs) who are poised to lead research studies and postdoctoral fellows and investigators who fit within the NIH definition of New Investigator. Candidates from high-income countries must have a clinical or research doctorate (including PhD, MD, DO, DVM, ScD, DNS, PharmD, or equivalent doctoral degrees), and LMIC candidates must have at least a master's degree or equivalent and 4+ years of relevant research experience, with some exceptions.

**As part of the Letter of Intent**, applicants must include information on which category of eligibility they fall under, along with their biosketch that clearly demonstrates eligibility under one of the below categories (LOI instructions on page 9).

1. LMIC Applicants
  - a. LMIC applicants with at least a master's degree or equivalent degree and 4+ years of experience.
  - b. Applicant recommended by a CREID RC PI who does not fit any of the other criteria.
2. Postdoctoral Fellows or Clinical Research Fellows
  - a. Applicants who hold a clinical doctoral degree (MD, DO, DVM, DNS, PharmD) must provide evidence of formal research training completed prior to submission of application.
  - b. Should have protected time to devote to the proposed research project.
3. New Investigator
  - a. Not previously competed successfully as PD/PI for a substantial independent research award. See the NIH website for more information on the definition of substantial research: <https://grants.nih.gov/policy/early-investigators/list-smaller-grants.htm>.

Both international and U.S. (domestic) researchers are eligible to apply, inclusive of those who have an official affiliation with a CREID Network RC and those who are not currently affiliated with the CREID Network. **As part of the Letter of Intent**, applicants need to include the name of the collaborating RC (LOI instructions on page 9).

- Unaffiliated applicants must establish a collaboration with a CREID RC. Additional information about each RC is included on the CREID Network website (<https://creid-network.org/>).
- As part of the full application, all applicants must submit a Letter of Collaboration from the affiliated CREID RC Principal Investigator with whom they are collaborating.

### **Applying as Co-PIs**

Up to two applicants can apply as Co-PIs for a single application; however, the budget ceiling remains the same (\$150,000 in total costs). If the two applicants are from different institutions, each applicant must provide a detailed budget, with the total of the two budgets not exceeding \$150,000 in total costs. In the application, Co-PI applicants will need to include a justification for the Co-PI approach and add a plan for managing the project jointly.

### **1.4 CREID Research Center Engagement**

**Each CREID Research Center can support three applications for submission.** Applicants must contact the RC they are interested in collaborating with as early as possible, but no later than **November 24, 2021**, to ensure alignment with RC priorities and to confirm support prior to submission of the Letter of Intent. RCs are encouraged to consider diversity, equity, and inclusion goals in their selection of applicants to move forward.

The application process is considered part of the capacity-building process for applicants. As a result, RCs are expected to work closely with selected applicants on their application package to provide support on grantsmanship, biostatistics, and other application needs.

**As part of the Application Package**, each applicant must include a Letter of Collaboration from the affiliated CREID RC. The Letter of Collaboration must address the following questions:

- Does this applicant and their proposed research study build the capacity at the Research Site for the RC?
- How will the RC contribute to the development and success of the applicant?
- Will the proposed research study allow the applicant to expand their skill set?
- Is the proposed research study structured to establish linkages with in-country stakeholders?
- Will the proposed research study lead to a conference abstract or publication?
- Will the proposed research study establish the applicant as a mentor for other early career researchers?
- What is the long-term vision of the applicant as it relates to RC research priorities, in-country research needs and capacity, or other?
- If the application includes Co-PIs, how will the Co-PI approach strengthen the proposed research study and ensure adequate skills building for each applicant?

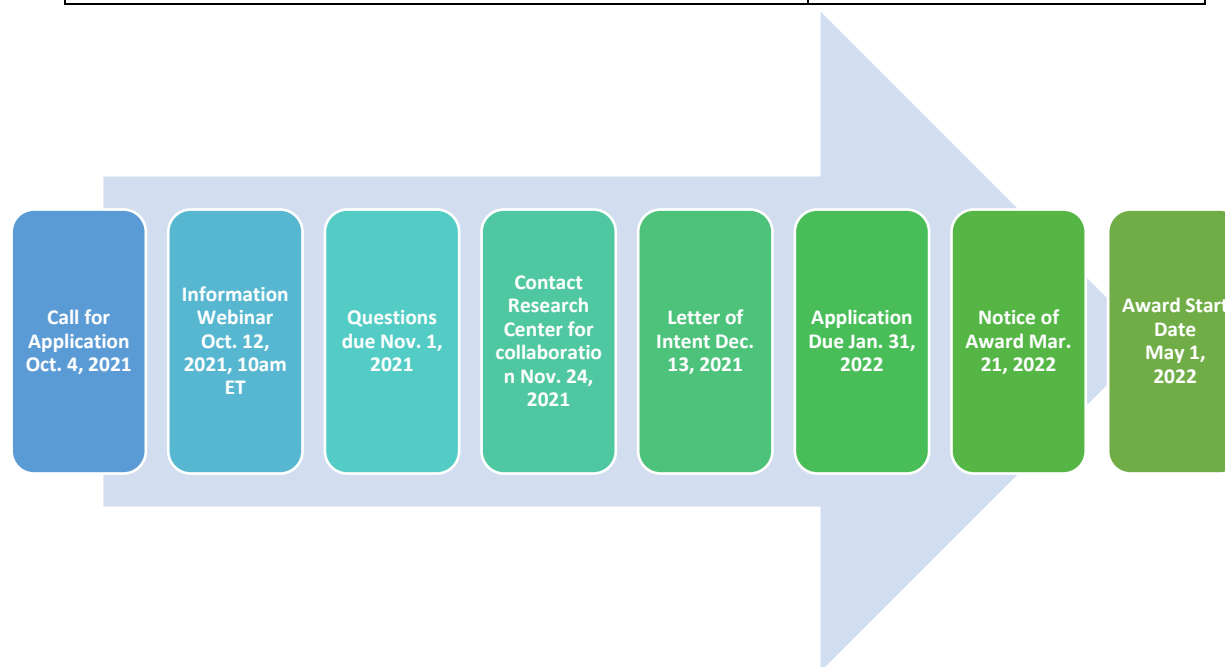

### **1.5 Funding**

Awards will be made to the institution managing the award in the applicant's name. These will be subawards made by RTI International as part of its prime CREID CC NIAID award. Budget requests need to reflect the actual needs of the proposed project. If two applicants apply as Co-PIs, if selected, their institutions would each receive a subaward, with the total funding for the combined award not exceeding \$150,000.

Type	Period of Performance	Maximum Total Cost (Direct and Indirect)
Grant with milestones	12 months	\$150,000 USD

### 1.6 Pilot Program Timeline

<b>Call for Applications Release</b>	October 4, 2021
<b>Webinar for Applicants</b>	October 12, 2021, 10am ET
<b>Deadline for Questions</b>	November 1, 2021
<b>Responses to Questions Available</b>	November 15, 2021
<b>Deadline to contact Research Center for collaboration</b>	November 24, 2021
<b>Deadline for Letter of Intent</b>	December 13, 2021
<b>Deadline for Full Application</b>	January 31, 2022
<b>Notification of Award</b>	March 21, 2022

## 2. Application

All applications must include the following elements (as applicable) in the order listed below. Page limits are noted where applicable. Failure to include a required element may result in the application not being reviewed. Where indicated, start each component on a new page with the component title, PI name, and study title at the top of the first page. All applications must be in English.

Questions about the application process will be received until **November 1, 2021**, by email to [info@creid-network.org](mailto:info@creid-network.org). The CREID CC will respond to the inquiry directly and post all questions and responses on the CREID Network website (<https://creid-network.org/pilot-program>) by **November 15, 2021**.

## 2.1 Informational Webinar

The CREID CC will host an informational webinar on Zoom for interested applicants on **Tuesday, October 12 at 10am Eastern Time**. The CREID CC will use this live webinar to discuss the application process and application package in detail and will include time for questions from participants. The webinar will be recorded and posted to the Pilot Program webpage for those unable to participate in the live session. To register for the webinar, please email [info@creid-network.org](mailto:info@creid-network.org). The CREID CC will send a Zoom link to access the webinar.

## 2.2 Letter of Intent

**A Letter of Intent (LOI) must be submitted by December 13, 2021, via email ([info@creid-network.org](mailto:info@creid-network.org)), and the collaborating RC must be copied on the LOI submission. The LOI shall not exceed two pages, excluding the biosketch and submission checklist, and include the following:**

- The title of the application.
- The name(s) and affiliation(s) of the applicant PI and, if any, co-PIs. Please clearly identify co-PIs as such.
- The category of eligibility of the applicant(s) (see Section 1.3).
- The address, phone number, and email address of the applicant PI and co-PIs, if any.
- The name, institutional affiliation, address, phone number, and email address of the institutional signing official responsible for executing the award on behalf of the applicant PI. Please note that if this information changes upon award, this may delay execution of the award.
  - If there is a co-PI who is affiliated with a different institution, include the name, institutional affiliation, address, phone number, and email address of the institutional signing official responsible for executing the award on behalf of the co-PI.
- The name of the CREID RC the applicant PI is affiliated or collaborating with.
- The name, position, affiliation, address, phone number, and email of the RC Mentor.
- If there will be other mentors (not required), include the name position, affiliation, address, phone number, and email of other mentor(s) unaffiliated with the collaborating RC.
- A brief overview of the study including research aims and objectives and a list of the sites where the study will be conducted.
- If you are proposing a human subjects or animal research study, please describe the already approved study it is nested within and your plan to obtain an IRB or IACUC modification for the proposed study within 2 months of award.
- If you are proposing a study involving a select agent, indicate the select agent and address the issues identified in Section 1.2 about prior approval.
- Additional documents to submit with LOI:
  - **Biosketch of the applicant PI and the Co-PI** if one is included (*Template provided*). NIH Biosketch Instructions: <https://grants.nih.gov/grants/forms/biosketch.htm> (*NOTE: The Pilot Program is using the new non-fellowship biosketch format required for applications submitted after January 25, 2022.*)
  - **Submission Checklist: Letter of Intent** (*Template provided*): Please complete and submit the submission checklist for the LOI. This is intended to assist applicants to ensure that all elements of the LOI are addressed.

*The LOIs are for planning purposes only, and no response from the CREID CC is required to proceed with the full application. If any concerns or questions are identified upon review of the LOI, the CREID CC will contact the investigators to share that information.*

### 2.3 Full Application Format and Deadline

All applications should be submitted as a **single PDF** file, except for the full budget and budget justification PDF form, which should be a **separate file**. All text should be in Calibri with a font size of no less than 11, with normal text spacing required. All margins should be at least one inch. Inclusion of URLs to provide additional information is prohibited in all sections. All required templates are available on the CREID Network website: <https://creid-network.org/pilot-program>

**All final applications must be submitted via email as a single PDF and separate budget with justification no later than 11:59 PM Eastern Time, Monday, January 31, 2022 [info@creid-network.org](mailto:info@creid-network.org)**

### 2.4 Full Application Submission Requirements

The full application consists of the following components. See the CREID website for all application templates, <https://creid-network.org/pilot-program>:

Item	Description
<b>Application Cover Sheet</b> <i>(Template provided)</i>	Please be sure to include information on the organization managing the funds for the award. The cover sheet includes an abstract that will be used for public announcements about the program.
<b>Title and Table of Contents</b>	Provide the title of the proposed project and a Table of Contents for the full Application.
<b>Study Personnel</b> <i>(1-page limit)</i>	Demonstrate that the applicant PIs, collaborators, and other researchers are well suited to the project, have an ongoing record of accomplishments, and address how the study personnel will work together, including roles and responsibilities for each team member. The applicant should include a mentor in the personnel section; however, mentors should not anticipate financial compensation for the role. All funds will go to the institution affiliated with the applicant.

Item	Description	
<b>Research Aims &amp; Objectives</b>		Research aims and objectives should be clearly defined and sensibly tied to a definite research question. A clear endpoint or set of endpoints should be tied to each objective.
<b>Study Rationale/ Research Gap/Impact</b>	<i>7-page limit (aims, rationale, significance /approach, methods).</i>	Projects should address an important problem, gap, or critical barrier to progress in the field of study. The project should address an area of need targeted by the CREID Network. All projects must be in line with the scientific mission of the CREID Network. Priorities specific to this Call for Applications are included in Section 1.2. See the CREID website for more information on each RC and the Network priorities ( <a href="https://creid-network.org/">https://creid-network.org/</a> ).
<b>Significance and Approach</b>		<i>Use clearly marked section titles for each section</i>
<b>Research Methods</b>		The overall strategy, methodology, statistical plan, and analyses should be well reasoned and appropriate to accomplish the specific aims of the project. A sample size estimate must be included and supported by a power analysis or other justification that demonstrates the adequacy of the sample size. Address how potential problems will be resolved, identify possible alternative strategies, and include benchmarks for success.
<b>Project Timeline</b> <i>(1-page limit)</i>	Applicants need to provide a detailed timeline for their project, including key milestones and activities over the course of the project.	
<b>Research Performance Sites</b> <i>(1-page limit)</i>	Applicants should describe how the project benefits from unique features of the scientific environment, or collaborative arrangements. A description of all locations should also be provided including how each proposed site contributes to the study and how the applicant will use these sites to complete the study protocol.	
<b>CREID Research Center Collaboration</b> <i>(1-page limit)</i>	The collaborating CREID RC should be meaningfully integrated into the project to support the applicant with oversight, guidance, and coordination, and provide analytic support, as needed, in designing study randomization and performing statistical analyses. The Pilot Research Program application and proposed work should be closely linked to the work or expertise of the collaborating RC.	
<b>Mentoring Plan</b> <i>(2-page limit)</i>	Applicant should describe the mentoring plan agreed upon with the applicant's mentor(s), both the RC Mentor and if applicable, a Scientific Mentor (if different than the RC mentor), including what the mentor's expertise is and how that aligns with the applicant's career goals, how the mentor will help build the applicant's leadership and independence and meet their professional development goals; a communication plan for ongoing, active engagement with the mentor; and how frequently the applicant will more formally meet with the mentor.	

Item	Description
<p><b>Vertebrate Animals Section Requirements</b> (3-page limit)</p>	<p>Include a summary of the parent study and IACUC approval information for the study.</p> <p><b>1. Description of Procedures (Vertebrate Animals Section)</b> Provide a concise description of the proposed procedures to be used that involve live vertebrate animals. Identify the species, strains, ages, sex, and total number of animals by species to be used. If dogs or cats are proposed, provide the source of the animals.</p> <p><b>2. Justifications (Vertebrate Animals Section)</b> Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g., computational, human, invertebrate, in vitro).</p> <p><b>3. Minimization of Pain and Distress (Vertebrate Animals Section)</b> Describe the interventions to minimize discomfort, distress, pain, and injury. These include analgesia, anesthesia, sedation, palliative care, and humane endpoints.</p> <p><b>4. Method of Euthanasia (Cover Page Supplement / PHS Fellowship Supplemental Form)</b> Provide a justification for methods of euthanasia that are not consistent with the American Veterinary Medical Association (AVMA) Guidelines for the Euthanasia of Animals. If answer is “No” to the question “Is method consistent with AVMA guidelines?”, describe the method and provide scientific justification in the text field provided. For more information: <a href="https://olaw.nih.gov/guidance/vertebrate-animal-section.htm">https://olaw.nih.gov/guidance/vertebrate-animal-section.htm</a>.</p>
<p><b>Human Subjects Research</b> (3.5-page limit)</p>	<p>Include a summary of the parent study and IRB approval information for the study.</p> <p>All applicants proposing human subjects research, either exempt or non-exempt, should address the following elements on the Protection of Human Subjects:</p> <ul style="list-style-type: none"> <li>• Risks to the subjects</li> <li>• Adequacy of protection against these risks</li> <li>• Potential benefits of the research to the subjects and others</li> <li>• Importance of the knowledge gained or to be gained</li> <li>• Country- / institution-specific ethics / IRB regulations addressed</li> </ul> <p>For more information on human subjects research, please visit the NIH website: <a href="https://grants.nih.gov/policy/humansubjects.htm">https://grants.nih.gov/policy/humansubjects.htm</a> and Office for Human Research Protections website: <a href="https://www.hhs.gov/ohrp/regulations-and-policy/index.html">https://www.hhs.gov/ohrp/regulations-and-policy/index.html</a>.</p> <p>The collaborating RC partner should provide additional guidance/support as needed to help applicants navigate this topic.</p>
<p><b>Research and Other Related Project Information</b> (Template provided)</p>	<p>Complete the R&amp;R Other Project Information Form. This form includes questions on use of human subjects, vertebrate animals, and environmental impact. For guidance on completing the form, please see G.220 - R&amp;R Other Project Information Form (<a href="https://grants.nih.gov/grants/how-to-apply-application-guide/forms-e/general/g.220-r&amp;r-other-project-information-form.htm">https://grants.nih.gov/grants/how-to-apply-application-guide/forms-e/general/g.220-r&amp;r-other-project-information-form.htm</a>).</p>

Item	Description
<p><b>Research and Related Budget and Budget Justification</b> (<i>Template provided</i>)</p> <p><i>Download the budget template from the CREID website as it is a fillable form and cannot be viewed in a web browser.</i></p>	<p>A full budget, with total costs of no more than \$150,000, must be submitted on the budget form available on the CREID Network website.</p> <ul style="list-style-type: none"> <li>• A budget justification which describes the labor and other direct costs necessary to complete the project must be included here. The budget should reflect direct and indirect costs for the 1-year period of award. The budget should include travel costs to attend the 3-day CREID Network Annual meeting in the Rockville, MD, area. If you plan to travel to another site or lab as part of your research study, please include those costs in your budget, staying within the budget ceiling of \$150,000.</li> <li>• If you plan to purchase a piece of equipment, please note that any equipment purchases over \$20,000 require a supplier quote and NIH approval upon award and prior to purchase.</li> <li>• Foreign institutions should use 8% as the standard indirect rate.</li> <li>• If two applicants apply as Co-PIs for a single application, the budget ceiling remains the same (\$150,000 in total costs). If the two applicants are from different institutions, each applicant must provide a detailed budget, with the total of the two budgets not exceeding \$150,000 in total costs.</li> <li>• Because CREID Pilot Program funding is available as a subaward of the prime CREID CC NIAID award, all subawards will be subject to the same policies and restrictions as the award for the CREID CC.</li> <li>• If your institution does not have adequate funds for a cost-reimbursement award (with monthly invoicing) and requires pre-payment of funds during the award year, please note this in your budget justification and outline a payment schedule that will function for your project.</li> </ul>
<p><b>Supporting Documentation</b> (<i>Templates provided: Biosketch, Support</i>)</p>	<p>Start each document on a new page with complete header information. Include only those components described within this Call for Applications; inclusion of items not requested may result in the removal of those items or administrative withdrawal of the application.</p> <p><b>Biographical Sketch and Other Support.</b> All applications must include:</p> <ul style="list-style-type: none"> <li>• Applicant PI Biographical Sketch (<i>four-page limit</i>)</li> <li>• Applicant PI Previous/Current/Pending Support (<i>include funding amount from each support source – no page limit</i>)</li> <li>• Mentor Biographical Sketch (<i>four-page limit</i>)</li> <li>• Mentor Current/Pending Support (<i>no page limit</i>)</li> <li>• Key Personnel Biographical Sketches (<i>four-page limit each</i>)</li> <li>• Key Personnel Current/Pending Support (<i>no page limit</i>)</li> </ul> <p>Please see the NIH website for instructions on completing the Biosketch (<a href="https://grants.nih.gov/grants/forms/biosketch.htm">https://grants.nih.gov/grants/forms/biosketch.htm</a>) and Other Support form (<a href="https://grants.nih.gov/grants/forms/othersupport.htm">https://grants.nih.gov/grants/forms/othersupport.htm</a>). <i>NOTE: The CREID Pilot Program is using the new non-fellowship formats required for applications submitted after January 25, 2022.</i></p>

Item	Description
	<p><b>Co-PI Plan (only needed if applying as Co-PIs) (one-page limit):</b> If two applicants are applying as Co-PIs on the same application, include a plan that details:</p> <ul style="list-style-type: none"> <li>• What each Co-PI will contribute to the proposed research study</li> <li>• How the Co-PIs will jointly work with the affiliated RC</li> <li>• How the Co-PIs will jointly manage the proposed study</li> </ul>
	<p><b>References Cited (no page limit):</b> List the references cited in the Research Methods (including URLs or DOIs if available) using a standard reference format that includes the full citation (i.e., author[s], year published, title of reference, source of reference, volume, chapter, page numbers, and publisher, as appropriate).</p>
	<p><b>List of Abbreviations, Acronyms, and Symbols:</b> Provide a list of all abbreviations, acronyms, and symbols used in the application.</p>
	<p><b>Facilities, Existing Equipment, and Other Resources (template provided):</b> Describe the facilities and equipment available for performance of the proposed project and any additional facilities or equipment proposed for acquisition at no cost to the award. Describe how containment facilities are appropriate for the proposed research. Indicate whether Government-furnished facilities or equipment are proposed for use. If so, reference should be made to the original or present Government award under which the facilities or equipment items are now accountable.</p>
	<p><b>NIH Foreign Clearance form (template provided).</b> Applicants must complete the NIH Foreign Clearance form. This form is required by NIH to gain U.S. Government approval to conduct research at a foreign research site. If your research will be conducted in more than one foreign research site, please fill out the form for each site. Please ensure that the form is correctly filled out with the information about the institution overseeing the implementation of the award and administering the funds for the award. If the institution that will oversee the implementation of the award is different from the institution that will administer the funds and are located at separate foreign sites, please complete separate NIH Foreign Clearance forms for each and identify their respective roles clearly.</p>
	<p><b>Letters of Organizational Support (two-page limit per letter):</b> Provide a letter (or letters, if applicable), signed by the appropriate organization official, reflecting the institution’s commitment to the completion of the study, including protected time of the applicant to complete the study, laboratory space, equipment, and other resources available for the project.</p>
	<p><b>Letter of Collaboration from CREID Research Center PI (two-page limit per letter):</b> Provide a signed letter from the collaborating CREID RC contact PI that will demonstrate that the PI has the support or resources necessary for the proposed work. See Section 1.4 for questions the RC PI must address in the Letter of Collaboration.</p>
	<p><b>Letter from Research Center Mentor (two-page limit):</b> Provide a signed letter from the designated RC mentor that demonstrates how the mentor will support the applicant as outlined in the mentoring plan.</p>

Item	Description
	<b>Letter from Primary Scientific Mentor</b> (if different than RC mentor) ( <i>two-page limit</i> ): Provide a signed letter from the designated scientific mentor that demonstrates how the mentor will support the applicant as outlined in the mentoring plan.
	<b>Submission Checklist: Application</b> ( <i>template provided</i> ): Please complete and submit the submission checklist for the application. The checklist is intended to assist applicants to ensure that they submit a complete application package.

### 3. Application Review and Selection Process

#### 3.1 Review Criteria

To determine scientific and technical merit, all applications will be evaluated by a peer-review committee according to the following scored criteria.

##### 3.1.1 Research Rational, Strategy, and Feasibility

- Are the overall strategy, methodology, and analyses well-reasoned and appropriate to accomplish the specific aims of the project?
- Are the potential problems, alternative strategies, and benchmarks for success clearly laid out and sufficiently addressed?
- Is the study, as proposed, likely to be completed in the designated time period and with the available budget?
- Is the statistical plan appropriate for addressing the research questions, given the design of the study?
- Are the sample size calculations clearly described and is the proposed sample size adequate given the goals of the study?

##### 3.1.2 Significance & Impact

- Does the project address an important problem or a critical barrier to progress in the EID field consistent with the mission and objectives of the CREID Network?
- Are the project aims achievable and will they advance scientific knowledge or technical capacity?

##### 3.1.3 Personnel

- Do the background and expertise of the PI(s) and other key personnel demonstrate their ability to perform the proposed work?
- Are the levels of effort by the PI(s) and other co-investigators appropriate to ensure the successful conduct of the project?
- Do the PI(s)' and co-investigators' records of accomplishment demonstrate their ability to accomplish the proposed work?

##### 3.1.4 Environment

- Is the scientific environment appropriate for the proposed research?
- Are the facilities and resources adequate to support the research requirements?
- Are the quality and extent of organizational support appropriate for the proposed research?

##### 3.1.5 CREID Research Center Collaboration Plan

- Does the project fit within the RC's overall objectives or expertise?

- Is the RC guidance integrated into the project and are the roles and responsibilities between the applicant and the RC collaborators complementary?
- Is the collaboration plan appropriate for the overall success of the project?

#### *3.1.6 Mentoring Plan*

- Is the plan for communication appropriate throughout the project timeline?
- Are the roles and responsibilities in the mentor-mentee relationship appropriate and reasonable?
- Will the applicant's professional development goals be adequately met through this award?
- Is the mentor sufficiently involved to help build the applicant's leadership and independence and to meet the applicant's professional development goals?
- Does the mentor's biosketch demonstrate appropriate expertise to mentor the applicant?

In addition, the following unscored criteria will contribute to the overall evaluation of the application:

#### *3.1.7 Budget*

- Is the budget appropriate for the proposed research and within the funding limitations?
- Is there sufficient level of effort for the PI to complete the research study as described?

#### *3.1.8 Vertebrate Animals*

- Is the proposed research involving vertebrate animals scientifically appropriate, including the justifications for animal usage and protections for research animals?
- Does the applicant adequately describe the following?
  - Description of procedures
  - Justification of species and numbers of animals used
  - Minimization of pain and distress
  - Method of euthanasia

#### *3.1.9 Protection of Human Subjects*

- Does the applicant adequately describe what they plan to do and how IRB / ethics board approval will be obtained?
- If they have any participant-facing activities, does the applicant address issues of confidentiality, data management, participant risks, and compensation?

#### *3.1.10 Inclusion of Women, Minorities, and Children*

- If the study involves the use of human subjects samples / data, does the sample population involve all relevant populations?

#### *3.1.11 Select Agents*

- Applicants may propose studies that involve pathogens that are considered select agents based on the Federal Select Agent Program definitions (<https://www.selectagents.gov/sat/list.htm>) if they can demonstrate the facility, organization, or institution where the select agent work is to be conducted has received prior approval from NIAID for the specific select agent to be utilized.

### 3.2 Programmatic Review

Following the Peer Review, the Programmatic Review of applications will be conducted by the CREID CC and NIAID's Division of Microbiology and Infectious Diseases (DMID). The CC, in collaboration with DMID, will make funding recommendations using the following criteria:

- Ratings and evaluations of the peer reviewers
- Relevance to the mission of the CREID Network, as evidenced by the following:
  - Relative impact
  - Program portfolio composition
  - Programmatic relevance
  - Adherence to the intent of the award mechanism
- Availability of funds

***Final selection of research awards will be made by the CREID CC.***

## 4. Post-Award Requirements

### 4.1 Regulatory Approvals

Pilot Program awardees must submit all required regulatory documents and approvals to the CREID CC before the study can be initiated. This includes IRBs, IACUC, CITI certificates for key personnel, etc. as appropriate. The applicant must submit any renewals or updated regulatory documents within 2 months of award. In addition, if the study has an international component, information on study location, site contacts, and Federalwide Assurance (FWA) (for human subjects research) will be required. For more information on FWA, please see the U.S. Department of Health and Human Services website: <https://www.hhs.gov/ohrp/register-irbs-and-obtain-fwaf/fwaf/index.html>

### 4.2 U.S. Government Approvals

Additional U.S. Government approvals may be required prior to initiating the Pilot Research Award, depending on the scope of the proposed research.

- DMID is required to submit any project foreign components through internal NIH systems for approval before studies can be initiated. The Foreign Clearance Form that is part of the application package includes the information that is needed for this approval. Awards that include foreign components may be subject to U.S. State Department approval. If the entities included in the completed Foreign Clearance Form(s) are not inclusive of all foreign sites and organization(s) which will implement and administer the funds of the proposed project, an award may be delayed substantially.
- The CREID CC or NIAID may require additional documentation/information as it pertains to planned select agent research.

## 5. Subaward Process

Once U.S. Government approval criteria are met, subawards will be made to each awardee by RTI International (on behalf of the CREID CC) to the applicant's institution that is administering the funding. These will be subawards issued by RTI International from the prime CREID CC NIAID award.

If your application is recommended for funding, subaward negotiations will be held between your institution that is managing the subaward and RTI International to establish the scope of the final

project. All official negotiations of the budget, terms, and conditions of any resulting subaward will be conducted between the Business Official of your institution and the RTI Subcontracts Specialist. All subawards, and changes to all subawards that result in substantive changes to the budget, including major modifications of the awards and changes across cost categories, require approval from the CREID CC and DMID.

### 5.1 Subaward Letters

If needed, RTI will issue initial subaward letters allowing for up to 10% of the total budget to be spent while full subaward negotiations take place, to allow awardees to initiate start-up activities.

### 5.2 Subawards

Awards will be made by RTI as a subaward of RTI's prime CREID CC NIAID award. The subaward will be made to the applicant's institution overseeing the financial administration of the subaward, as identified in the Foreign Clearance form submitted as part of the application package. If more than one institution will be managing the funds, please ensure that all institutions are clearly identified in the Foreign Clearance form(s).

### 5.3 Public Announcement of Awards

The CREID CC will publicly announce the Pilot Program awardees in conjunction with NIAID and will post the announcement on the CREID website and through the CREID Network Twitter account. This will be done once Foreign Clearance is conducted and approved by NIH and subawards are established.

### 5.4 Protocol

Awardees will be required to submit a protocol for their study within 2 months of award.

### 5.5 Data Sharing

Sharing unpublished data among network collaborators is one of the core principles of the CREID Network. Awardees are encouraged to work with their mentor and the CREID CC to establish infrastructure for the sharing of data that is not or will not be made immediately publicly available. The recommended infrastructure for this type of data sharing is ImmPort (<https://www.import.org/home>), so the awardee is encouraged to set up a free account. Awardees may also propose an alternative infrastructure if one is available.

### 5.6 Reporting

One interim progress report (6-month) and a final report (12-month) will be required by each awardee. The report template will be provided by the CREID CC. In addition to written progress reports, oral presentations will be expected at the CREID Network Annual Meeting and may be requested for Working Group and Steering Committee meetings.

### 5.7 Citing CREID in Scientific Products

Pilot Program awardees are required to cite the CREID CC award number and the assigned Pilot Program subaward number (1U01AI151378 xxx) in all scientific products resulting from the work funded through this program, including conference presentations and posters, peer-reviewed journal articles, and other scientific endeavors.

## 6. Capacity-Building and Mentoring Resources

The Pilot Research Program will include capacity-building and mentoring activities and resources. Capacity-building and training activities will be implemented in partnership with the CREID RCs and will complement the mentoring activities proposed by each awardee with their mentor and affiliated RC. Activities and resources will include establishing a mentoring agreement between the awardee and their mentor, holding quarterly meetings between the CREID CC and the awardees, including the awardees and their mentors in CREID Network Working Groups, peer mentoring, capacity building webinars, and in-person events.

### 6.1 Needs Assessment

The CREID CC will conduct a needs assessment survey of awardees and their mentors at the start of the award period to determine webinar topics and other capacity-building priorities for the awardees.

### 6.2 Pilot Research Program Mentor

Each awardee has identified one or more mentors as part of their application. The CREID CC will provide an agreement that each party must sign to formally establish the mentoring relationship. The agreement will establish clear expectations for both the mentor and the awardee. This collaboration will provide a platform for the Pilot Program awardee to discuss their research ideas and receive critical feedback on how to strengthen their approach and to understand and avoid roadblocks. The mentor can also provide connections to others working on the same ideas for collaboration and help the awardee avoid duplication of effort.

The CREID CC will be available on an ad hoc basis to the mentors to provide guidance or support as needed.

The Pilot Program awardees may need statistical mentoring from a CREID CC or Network statistician for guidance on issues related to study design and statistical analysis. The CREID CC will identify a statistician to provide this guidance.

### 6.3 Quarterly CREID CC and Pilot Program Awardee Meetings

The CREID CC will convene awardees on a quarterly basis to check in on how their research is progressing and to ensure that the mentoring relationship is going well. The CREID CC will use this

meeting to identify additional topics for capacity-building webinars. The first quarterly meeting will serve as the kickoff meeting for the program. Tentatively, these meetings will be held in June, September, December, and March.

#### 6.4 CREID Network Working Groups

CREID Network Working Groups are established under the auspices of the CREID Steering Committee to address scientific issues, undertake specific activities, and propose and review issues, policies, and procedures of interest to the CREID Network. Awardees and their mentors are invited to participate in the Working Groups as part of the Pilot Program. Current CREID Working Groups include the following:

- Biorepository Oversight and Quality
- Capacity Building and Sustainability
- Data Capture and Harmonization
- Laboratory Assay Quality and Oversight
- Outbreak Research Response

#### 6.5 Peer Mentoring

The CREID CC will facilitate peer mentoring by forming a cohort among the awardees so they can share information, ask questions, and discuss scientific research and career development issues with each other. The CREID CC will utilize Microsoft Teams to create a peer-to-peer mentoring community to foster and enhance real-time communications. Teams includes chat threads that can be designated for different conversations (e.g., biospecimen management, data analysis, quality assurance, specific viruses, such as Coronavirus, Flavivirus). The CREID CC Pilot Program coordinator will be part of these chat threads and will monitor the online engagement to identify and resolve issues that may arise.

#### 6.6 Capacity-Building Webinars

The CREID CC will coordinate webinars several times a year utilizing Zoom to include formal training presentations and question-and-answer discussion sessions between CREID Network investigators and awardees on an area of interest. These webinars will be recorded for viewing later. Possible topics could include (1) protocol development; (2) high-quality data collection and processing; (3) efficient development of study materials, including manuals of operations, and training materials; (4) detailed project team training on all aspects of implementing a study; (5) use of data capture systems; (6) study data oversight, quality assurance, and monitoring procedures; (7) statistical analysis; (8) biospecimen tracking; (9) lab quality assurance; and (10) presentation skills.

#### 6.7 CREID Network Annual Meeting

Pilot Program awardees are expected to attend and participate in the CREID Network Annual Meeting. The CREID CC will coordinate capacity-building and mentoring activities as part of the Annual Meeting. A Pilot Research Program session will be on the agenda for awardees to present on their research project. Mentoring activities could include speed mentoring sessions where investigators spend 10 minutes discussing a topic of interest with a senior researcher, then move on. These sessions will be held individually or in small groups of awardees paired with a senior researcher and may be held virtually as needed. Capacity-building activities could include a brief topic presentation or Q&A session followed by a mixer to allow early career and senior investigators the opportunity to connect on scientific areas of joint interest and develop mentoring relationships.

### 6.8 Scientific Conferences and Events

The CREID CC will coordinate activities, such as networking opportunities at in-person conferences. The CC will identify a select set of priority conferences each year to target for networking opportunities to bring together CREID Network researchers with awardees.

### 7. Pilot Research Program Evaluation

The CREID CC will evaluate the Pilot Research Program annually through a series of surveys conducted with the awardees, the mentors, and the CREID RC PIs. The evaluation will focus on the Pilot Program details and the mentoring and capacity-building activities. The CREID CC will use this feedback to make changes to the program in future years.

The CREID Network External Advisory Committee will review the progress of the CREID Network annually, including the CREID CC, and will provide recommendations to NIAID.
